

The Innovation in AWH Valve Technology.

VMove 1

the pneumatic actuator for butterfly valves

- continuous shaft with double bearing
- easy assembly of all additional units
- available with VMon control head
- 400,000 switching operations guaranteed
- optimised power transmission, more torque
- integrated position indicator with switch function
- holding devices for sensors including
- hygienic design with O-ring seal
- compact design, robust stainless steel construction
- swivelling metallic angular air connection

Technical Data

Connection	Inner square 9.5 mm
Operating pressure	max. 10 bar / max. 145 psi
Variants	Air/spring (opening left and right) Air/air (opening left and right)
Area of application	Butterfly valves from DN25 - DN100 Ball valves from DN40 - DN65
