

**Silent precision. Secure monitoring.
Reliable control.**

TANKO® ORS

With the new TANKO® ORS, developed by AWH, you get an innovative **monitoring solution** for your **tank cleaning**: The **optical rotation sensor** reliably and non-contact monitors the operation of spate cleaners in process plants.

Thanks to simple installation on the sight glass at the top of the tank and precise optical measurement, the sensor immediately detects every rotation as well as any failures and provides direct status information. This ensures maximum process reliability and efficiency – even in demanding applications.

Your benefits:

- Reliable monitoring of spate cleaner rotation
- Immediate detection of failures and malfunctions
- Visual status display directly on the sensor
- Easy installation and integration
- Robust, hygienic PPS housing
- Ideal for the food, beverage, chemical, and pharmaceutical industries

The TANKO® ORS – for uncompromising control and maximum safety in your tank cleaning process.
